Early August 1949

1. The officers of the KARLOVAC (Y 12/K 25) military post carried a new type of service pistol of 9 mm caliber. The pistols bore the following manufacturing arsenal marking: KRAGUJEVAC "AT 3" (Artileriski tehnicki zavod).

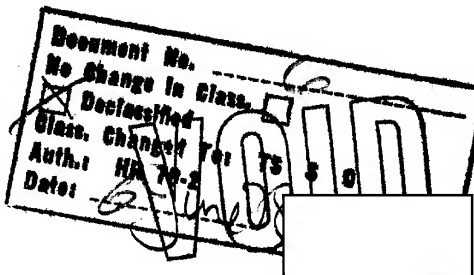

Mid-August 1949

2. Flame thrower practices by engineer units were observed at the KARLOVAC-KORANA troop training grounds. An engineer sergeant stated that the flame throwers were manufactured in KRAGUJEVAC.

Comment:

It was previously reported on an ordnance depot and a large ordnance repair shop in KRAGUJEVAC, where captured weapons were repaired in 1946. * It has not been reported before that new weapons were manufactured in KRAGUJEVAC.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
